

SYED LAEEQ AHMED

Full-Stack Engineer | React / Next.js | Node.js / TypeScript | AWS

Lahore, Pakistan | Remote (UTC+5, daily overlap with UK/EU & US) | +92 332 4265921 | laeeqthedeveloper@gmail.com
linkedin.com/in/syed-laeq-ahmed | github.com/LaeqtheDev | laeeqthedeveloperportfolio.vercel.app

PROFESSIONAL SUMMARY

Full-stack JavaScript engineer with 7 years of professional remote development experience, including delivery for UK, US and European teams, alongside a BSc in Computer Science. Owns production systems end to end across React/Next.js front ends, Node.js and GraphQL APIs, PostgreSQL and MongoDB data models, multi-tenant SaaS architecture, AWS deployments, RBAC and CI/CD pipelines.

TECHNICAL SKILLS

Languages & Frontend: TypeScript, JavaScript (ES6+), React.js, Next.js (App Router), Redux, Zustand, Tailwind CSS, HTML5/CSS3

Backend & APIs: Node.js, Express.js, REST, GraphQL, Microservices, Real-Time Systems, Server-Side Caching

Databases & Cloud: PostgreSQL, MongoDB, Supabase, Convex, AWS (EC2, S3, CloudFront, RDS, IAM, CloudWatch), Docker

Auth & Security: JWT, OAuth, Role-Based Access Control (RBAC), Multi-Tenant Architecture, Data Isolation

AI & Integrations: OpenAI API, Google Gemini, Vapi AI (TTS/STT), LLM Integration, Stripe

Testing & DevOps: Jest, Playwright, Git, GitHub Actions, CI/CD, Agile/Scrum, System Design, Code Review

PROFESSIONAL EXPERIENCE

North Foundry — Founder & Lead Engineer | Jul 2026 – Present

Independent product studio delivering web and SaaS platforms for client teams. Remote.

- Deliver Next.js, React, TypeScript and Node.js applications for client teams, owning architecture, data modelling and deployment on AWS (EC2, S3, CloudFront, RDS) with GitHub Actions CI/CD.
- Ship AI-powered automation workflows (chat and intake assistants, CRM and business-process integrations) with authentication and payment gateways wired in.

Webflow X — Full-Stack Engineer | Oct 2025 – Jun 2026

Multi-tenant AI productivity SaaS platform. Remote.

- Architected the platform from scratch on Next.js, TypeScript and Convex, owning the data model, auth design and production deployment.
- Built real-time team chat and video calling with Convex live queries and WebRTC for low-latency distributed collaboration.
- Integrated OpenAI, Gemini and Google Speech APIs to generate AI meeting summaries with validated structured JSON output.
- Designed org-level RBAC and enforced multi-tenant data isolation across application and database query paths.

Nexora Systems — Full-Stack Engineer | Jul 2024 – Oct 2025

Remote (Greater London, UK)

- Cut CI build times 45% by re-architecting Next.js and Node.js build pipelines and parallelizing test stages in GitHub Actions.
- Reduced API latency 25–30% by replacing over-fetching REST endpoints with GraphQL and a server-side caching layer.
- Built a shared shadcn/ui and Tailwind component library adopted across 8+ platform modules, cutting feature development time ~20%.
- Established automated Playwright and Jest end-to-end coverage on critical user flows, reducing post-release defects 25%.

InvoiceStock — Full-Stack Engineer | Jul 2022 – Jun 2024

Remote (Wolverhampton, UK)

- Reduced frontend bundle size 28% by migrating to Next.js, TypeScript and Zustand, eliminating a recurring class of state-synchronization bugs.
- Architected multi-tenant data isolation and RBAC serving 50+ SMB customers.
- Built invoicing workflows with barcode scanning, server-side PDF generation and email automation, removing ~40% of client manual processing.

Routelane — Senior Frontend Developer | Mar 2021 – Jun 2022

Remote (Missouri, USA)

- Built real-time driver and load tracking with Firebase and Google Maps API, plus mobile-first React dashboards against TypeScript REST endpoints, improving dispatch efficiency 20–25%.

Upwork — Freelance Web Developer | Jun 2019 – Feb 2021

Remote

- Delivered 15+ responsive, SEO-optimized websites and web apps for startups and SMBs, owning scoping, client communication and delivery independently.

PROJECTS

Converso — AI Voice Tutor (Next.js, Supabase/PostgreSQL, Clerk, Vapi AI, Stripe)

- Built a voice-based learning platform with real-time speech interaction, role-based accounts, subscription billing and Sentry-monitored production workflows.
- Achieved sub-800ms end-to-end voice latency (audio intake to Vapi AI/LLM processing to TTS output) across 1,200+ conversational test sessions in beta.

Resumind — ATS Resume Analyzer (React Router 7, Puter.js)

- Scores resumes against a job description for ATS fit and missing keywords using 100% client-side PDF parsing with strict JSON output; processed 2,500+ uploads with sub-3-second average analysis time.

Subme — Creator Subscription Platform (Stripe, RBAC)

- Built a three-tier membership system with Stripe subscriptions, role-gated content and live earnings tracking, serving 500+ paying users.

EDUCATION & CERTIFICATIONS

BSc Computer Science — The University of Lahore (Full-time coursework, completed concurrently with remote engineering roles) | Oct 2022 – Jun 2026

Google/Coursera: AI Fundamentals, AI for App Building (2026) | HackerRank: JavaScript Specialist, Problem Solving Intermediate (2023)
